Original title: Oxidative Stress-Related Genetic Polymorphisms in Nasopharyngeal Carcinoma: Emphasis on Gpx-1 and MPO Variants in Jordanian Population

Authors: Diana Bayyari and Yaqeen Rjoub

DOI: <https://doi.org/10.64813/ejmr.2026.077>

Date of retraction: 12-05-2026

This article has been retracted at the request of the Editor-in-Chief following an investigation that confirmed concerns regarding authorship, contributorship, and publication authorization of a previously published article in the Electronic Journal of Medical Research (DOI: <https://doi.org/10.64813/ejmr.2026.077>). After editorial investigation and communication with the involved parties, the journal determined that unresolved authorship and supervision disputes associated with the underlying academic work warranted retraction in accordance with publication ethics standards. This retraction is issued to maintain the integrity of the scholarly record. The authors and relevant parties have been informed of this decision, and they have agreed on this retraction.
